TITLE: Method for determination of eradication rate of Helicobacter pylori - by comparison of changing rate of pepsinogen I or pepsinogen II ratio before and after treatment

PRIORITY-DATA: 1996JP-0318558 (November 15, 1996)

## PATENT-FAMILY:

PUB-NO	PUB-DATE	LANGUAGE	PAGES	MAIN-IPC
JP 10148636 A	June 2, 1998		014	G01N033/569

ABSTRACTED-PUB-NO: JP10148636A

## BASIC-ABSTRACT:

A method for determin. of eradication rate of Helicobacter pylori by comparison of changing rate of pepsinogen I (PG I) or pepsinogen II (PG II), or PG I/PG II ratio before and after treatment, and (i) when the changing rate of PG I/PG II shows a predetermined value or over, then eradication is deemed accomplished in which the predetermined changing rate is defined according to the ratio of PG I/PG II before treatment, and (ii) when the changing rate or concns. of PG I or PG II shows equal or below predetermined value, and the ratio of PG I/PG II before treatment is equal or over predetermined value, and when the concn. of PG I or PG II after treatment shows equal or below predetermined value or a ratio than those of before treatment, then the eradication is deemed accomplished.

ADVANTAGE - Eradication can be rapidly and effectively determined without using endoscopy.

ABSTRACTED-PUB-NO: JP10148636A
